Alvaro
Sopeña Figueroa

About me

Since 2010 I began to study and make a career in the field of Foreign Trade. In 2020 I decided to turn into programming and Web Development, since my passion for learning is hard to fill. I'm always looking for opportunities and solutions that delivers value. I enjoy working in a team to reach common goals. I have the ability to help and organize the team. I like organization and be organizated.

- UI developer
- Web developer with Wordpress
  i.e. www.optime-translation.com
- Web developer – Html, Css, JS, Node.js.
  i.e. https://waiuagency.com/

Integrating project with Digital House

05/2020 - 05/2021

"**Turisteando**" Development of an e-commerce web application using Agile methodologies (scrum) and Git. HTML/EJS was used for the structure, CSS for the design, JavaScript for interactions and NodeJS and Express on the server side. A CRUD system was implemented for users and products with a MySQL database in Sequelize for its connection. An API was added which is consumed by a dashboard with a ReactJS architecture.
