Alvaro
Sopeña Figueroa

About me

Since 2010 I began to study and make a career in the field of Foreign Trade. In 2020 I decided to turn into programming and Web Development, i enjoy grinding and building. I'm always looking for opportunities and solutions that delivers value. I i enjoy working in a team to reach common goals. I have the ability to help and organize the team, i find easy to communicate with colleagues and create a good atmosphere.

  ej. https://waiuagency.com/

Integrating project with DIGITAL HOUSE

- "**Turisteando**" Development of an e-commerce web application using Agile methodologies (scrum) and Git. HTML/EJS was used for the structure, CSS for the design, JavaScript for interactions and NodeJS and Express on the server side. A CRUD system was implemented for users and products with a MySQL database in Sequelize for its connection. An API was added which is consumed by a dashboard with a ReactJS architecture.
